**DETAILED ACTION**

***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1-26 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. There is no support in the specification including the figures for the multi-dimensional movement of the weight.

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-26 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1 and 9 are vague and indefinite since it is unclear if the weight can/could be moved multi-dimensional, i.e., in the x-y and z direction, or that the movement of the weights in the other dimensions y and z is due to the free vibration of the weight? Note that the figures only show that the weight is moved in the horizontal direction, i.e., x direction, see figures.

***Claim Rejections - 35 U.S.C. § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-26 are rejected under 35 USC §102(b) as anticipated or in the alternative under 35 U.S.C. 103(a). This rejection is set forth in the prior Office action paper number 5.

***Response to Arguments***

5. Applicant's arguments filed on September 15, 2002 have been fully considered but they are not persuasive.

Applicants argue that the reference does not teach the multi-dimensional movement of the weight as it is now claimed and indicate that the figures show the multi-dimensional movement of the weight. However, the specification, including the figures, does not teach such movements, but the same movement as in the reference, i.e. x direction. As claimed, the claims read on the vibrational movement of the weight in the y-z direction, considering x being in the horizontal line of the figures plane, the sheet. That's not to say that weight is moved on the y-z directions, (besides the axial movement of the weight as indicated by the arrow of figures 2 and 6 of the present invention), but that the vibration of the system would also vibrate the weight. Therefore, the movement of the weight as claim is inherent to the system taught by the reference, since the weight 3 or 3' would also vibrate with the vibration of the roll and/or paper machine, albeit not freely.

*Conclusion*

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
